With great pleasure, I am delighted to invite you to the International Conference on Microbiology and Biotechnology which will be held in Rome, Italy, on June 10-12, 2024. The conference will focus on the theme of "Microbial Biotechnology for Sustainable Development" and will cover a wide range of advanced research topics, from basic to advanced, offering valuable insights into the latest advancements in the field.

My talk will present the uncommon manifestation of nontuberculous mycobacterial infections of the pleura. Surprisingly, these infections not only arise in immunocompromised hosts and patients with chronic lung disease, and they carry a poor prognosis which requires early diagnosis and aggressive therapy.

I look forward to seeing you in Rome.

Keren Bachar, MD
